

# TrueAir® Air Décor™

## Modern Design Blends into Home Decor

### Upscale Design for the Home

The Air Décor™ air purifier from TrueAir® seamlessly blends into the home environment, while providing HEPA-grade, energy-efficient air cleaning. Consumers want a healthy home, but they also want products that don't sacrifice style. The Air Décor™ air purifier was designed to meet both needs. With a unique design that differentiates it from other air purifiers, style is not relinquished for performance.

The HEPA-grade filter bag is 99.9% effective at capturing pollen, mold spores, pet dander, and dust mite debris to 3 microns, providing efficient operation. It comes folded and then inflates once it is installed. A filter indicator alerts consumers when it is time to replace the bag, which is typically six months.

This air purifier is Energy Star® rated and covers up to 240 sq. ft. It has variable speeds from Whisper Clean® to Quick Clean™ settings. Simply turn the knob until the desired speed is reached. Soft ambient light is available by pressing the button located under the on/off power.
