Good Thinking[®] Features

Eliminates Odors Within 6 feet of the Source. Give your baby's room a refreshing lift with the Hamilton Beach[®] Bébé Odor Eliminator.

- The efficient, whisper-quiet fan pulls in stale air and odors, and then passes them through a carbon filter before releasing a steady stream of naturally fresh air into the room.
- A gentle illuminating blue light comforts children through the night.
- Includes 3 replacement carbon filters, each lasting up to 90 days, depending on usage and household conditions. Filter-life indicator lets you know when 90 days have elapsed.
- Plugs into a standard wall outlet with easy access to 2nd plug.
- Compact design seamlessly blends with your existing décor.

Remove the Dirty Diaper Smell from Your Baby's Room

- The Hamilton Beach[®] Bébé Odor Eliminator is perfect for removing the dirty diaper scent from your baby's room or changing area. Simply plug it into a standard wall outlet (within 6 feet of the odor source) to begin removing offensive odors and freshening the air.
- Carbon is a natural way to absorb odor instead of masking it with chemical sprays or candles.
- Keep the air in your home smelling clean and pleasant by changing the carbon filter whenever the filter-life indicator displays it's time for a replacement (typically about 90 days). 3 replacement carbon filters are included.
